Metallurgical Sampling Non-Ferrous Coupon Mold

The Coupon Mold is designed to provide spectro-chemical analysis coupons from molten nonferrous alloys in seconds. The molten metal enters the center of the mold producing a mushroom shaped homogeneous coupon . This enables the spectrometer operator to sample the entire coupon surface.

The Coupon Mold is a rugged steel construction with a spring guard heat dissipating handle. Coupon size of 2.670 in. dia. X .500 in. thick, gate diameter of .380 for easy shearing.
